

# Need a ruler?

## Print this page to scale and check your compatibility and what version to choose

Thin version: 0.39" - 0.69" (10-17mm)  
Thick version: 0.71" - 1.0" (18-24.5mm)  
iPhone 12/13 compatible up to 0.80" (20mm)

**Please Note:** Wireless charging efficiency is higher at shorter distances so where possible, please choose 'Thin' version for better results and universal compatibility.

**Camera Bumps:**  
Phones with large camera bumps (iPhone 12 Pro Max, 13 Pro/Max, Samsung Ultra 5G) please work towards 'Thin' specification as the camera modules add additional distance.

Phone cases can add up to around 0.07" (2mm) - if your table is on the edge between thin and standard and you always use a case, please choose standard and always use on low setting.
